

### 4.1 Angles and Their Measures

Review: Describe and convert between radian and degree measure

#### Review of Prior Concepts

The wheels on the bus go round and round, round and round, round and round.  
The wheels on the bus go round and round, all through the town.  
If the radius of the wheel of the bus is 70 cm, what is the circumference of the wheel?

14. Use structure to isolate or identify a quantity of interest in an expression

Example:

$$V = \pi r^2 h$$

9	○	○	○	○

**NOTE:** You may start your answers in any column, space permitting. Columns you don't need to use should be left blank.

A dairy farmer uses a storage silo that is in the shape of the right circular cylinder above. If the volume of the silo is  $72\pi$  cubic yards, what is the diameter of the base of the cylinder, in yards?

Solution

## Vocabulary

- Degree -

Degree of  $\odot$  = \_\_\_\_\_

- Radian -

Radian of  $\odot$  =  $\frac{\text{Length of } \odot}{\text{Length of radius of } \odot}$  = \_\_\_\_\_ =

## Convert from Degrees to Radians

Multiply degrees by \_\_\_\_\_

*Example:* Convert  $36^\circ$  to radians

## Convert from Radians to Degrees

Multiply radians by \_\_\_\_\_

*Example:* Convert  $\frac{2\pi}{3}$  radians to degrees

Arc Length

$$\widehat{AB} = \text{—————} ( \quad )$$

$$= \text{—————} ( \quad )$$

$$=$$

$$=$$

where  $\theta$  is measured in degrees

\*What if  $\theta$  is measured in radians?

$$S =$$

$$S =$$

where  $\theta$  is measured in radians

**SAT Connection****Solution**

**The correct answer is 6.** The volume of a cylinder is  $\pi r^2 h$ , where  $r$  is the radius of the base of the cylinder and  $h$  is the height of the cylinder. Since the storage silo is a cylinder with volume  $72\pi$  cubic yards and height 8 yards, it is true that  $72\pi = \pi r^2(8)$ , where  $r$  is the radius of the base of the cylinder, in yards. Dividing both sides of  $72\pi = \pi r^2(8)$  by  $8\pi$  gives  $r^2 = 9$ , and so the radius of base of the cylinder is 3 yards. Therefore, the diameter of the base of the cylinder is 6 yards.
