4. Go to http://www.mathguide.com/cgi-bin/quizmasters/CShyperbolas.cgi and do one problem.

5.	Determine the equation of an ellipse that has these characteristics: $V(3,6)$ and $V(3,-2)$ and length of opposite axis is 10 units. Hints: First, find the center. Next, start building the equation.
6.	Determine the equation of a hyperbola that has these characteristics: $V(\pm 4,0)$ and $F(\pm 5,0)$. Hints: First, start
0.	building the equation. Next, use the focal formula to determine the missing information to complete the equation.
7.	Go to http://www.mathguide.com/lessons/ConicSections.html and read the section called "Identifying Conic Sections in General Form." After examining the examples and the flowchart, do three problems at http://www.mathguide.com/cgi-bin/quizmasters/CSi.cgi .
