

## KC 1 Extra Review Problems

What are the local max/min values?

On which intervals is the function increasing/decreasing?

KC 1 Extra Review Problems

$$f(x) = \frac{x + 2}{x^3 - 3x^2 - 10x}$$

Is  $f(x)$  continuous?

At what  $x$ -values do the discontinuities occur?

Which discontinuities are removable? Non-removable?

### KC 1 Extra Review Problems

Motodimos makes a certain cell phone for \$80. The cost for overhead for production is \$150,000.
